Ladders

Product Code: LA3004

#### Product Description

The LCS Ladder Safety Lock makes working at heights safer, easier and is simply more practical than any other conventional ladders or accessory presently on the market. The LCS Ladder Safety Lock is a ladder accessory that fits onto most conventional ladders with exterior widths between 35cm and 50cm. The LCS Safety Lock can be safely installed within 30 seconds and is safe to use on stairs or any rough terrain with a gradient slope of up to a 35 degrees with a 250kg load.. The LCS Ladder Safety Lock is highly recommended for builders, painters, gardeners, fire fighters and rescue workers that need to reach heights on uneven and sloping terrain, without compromising their safety.
